

Leadership Song Presentations

Choose a song that contains a leadership message. You will make a presentation using this song and explain why its message is personally important to you. Really think this through. There are so many great songs out there and so many that have important messages. This is **NOT** about what music you listen to on a regular basis. Think outside your own parameters. You will need to print the lyrics for everyone. You will need to really read these lyrics to make certain the message is a good one.....and remember...like always....it **MUST** be rated "G".

The requirements are as follows:

- Type out the words to the song. Underline the words or passages that you think are the important ones in the lyrics. If you want to write messages in the margins, that's fine too. You will need a copy for everyone in the class...including me! If you need for me to copy the lyrics for you, you **MUST** get them to me the day before your scheduled presentation.
- You may present the song in any manner you wish. You may play the CD, do a power point, actually sing or play the song, use a video, or talk over the music as it plays. We will show the power points in the theatre or on the SMART board.
- You **MUST** relate the song to yourself as a leader at some point in the presentation. You **MUST** explain why this is a great leadership song and what it means to you personally. Relating the song to your personal experiences is very important.
- At the conclusion of the presentation, you are expected to give each person in the class some sort of token to remember your song and message. Be creative in this.....make it something that really relates to your song.

You MUST be ready on your assigned date.

HAVE FUN!!!!!!
