

ONBOARD CHIP

There is inside my very head
a chip programmed by things I've said

It records my every thought and deed
and forms my every wish and need.

Habits learned and burned into
my chip create what I can do.

My vision's filtered through a glass
made from memories of my past.

In daily choices my chip seems
to limit me to my past dreams.

It blocks new things that come my way
and leaves me with my yesterday.

But, at last, today I see
I am in charge if the chip in me.

And since I program that chip of mine,
I can change ME anytime!

I can decide to reprogram
and build a better WHO I AM.

Here's a little special tip:
You too have an onboard chip.

Choose your thoughts and words with care,
the future YOU building there!
